01 PROFILE

I am a passionate **Full-Stack Web Developer** transitioning from an engineering background, with a focus on building responsive, user-friendly web applications. With a solid foundation in *HTML, CSS, JavaScript, React, Node.js, and PostgreSQL*, I combine technical expertise with a strong analytical mindset from my engineering studies. Known for my commitment to delivering high-quality, impactful solutions, I am eager to contribute to projects that make a difference and create seamless user experiences across all devices.

02 EMPLOYMENT HISTORY

07/2024 — Present	Frontend Developer at King's Touch Church	Dar es Salaam
As a frontend developer for King's Touch Church’s administrative dashboard, I design and implement interactive pages using React.js. This project integrates with a custom API to display church statistics, including member information, offerings, and event data, ensuring a user-friendly interface for admin use. My role focuses on creating dynamic and accessible designs that enhance data visualization and user engagement within the church’s internal systems.		

03 EDUCATION

Oct 2023 — Aug 2024	UDEMY	Online
Complete Web Development Bootcamp		
Completed an intensive web development program covering full-stack skills, including HTML, CSS, JavaScript, Node.js, React, Express.js, and PostgreSQL. Gained hands-on experience with real-world projects, focusing on both frontend and backend development, database integration, APIs, and responsive design.		

04 SKILLS

HTML	Node.js
CSS	Bootstrap
Javascript	Database Integration
React.js	API data handling

05 PERSONAL PROJECTS

[To-go List](#)

A simple React application to manage a list of travel destinations. Users can add, edit, mark as complete, and delete destinations they plan to visit. The app also includes dark mode.

[Books Notes](#)

A simple web application to manage a collection of books people have read, allowing users to 'add, update and delete' the notes about the book, search, and sort books.

[Weatherly](#)

A simple weather App using public API to search and provide weather information of different cities!

[Hopeful Blog](#)

A blog view-page for motivational and biblical quotes that one can add, like, edit or delete the posts on display.
